

Comments and Whitespace in HTML

HTML Comments

Comments are notes in your HTML code that are ignored by the browser. They are useful for explaining code or leaving reminders.

Syntax:

```
<!-- This is a comment -->  
<p>This is visible content.</p>  
<!-- <p>This line will not show on the webpage.</p> -->
```

Comments do not appear on the webpage. They're only visible in the source code. Do not write sensitive information as comment. Ex Loggin ID and passwords

Whitespace in HTML

Whitespace includes spaces, tabs, and newlines (Enter key). HTML treats multiple spaces as a **single space**.

Example:

```
This is spaced.
```

```
<p>This    is    spaced.</p>
```

This will be displayed as:

If you want to preserve spaces and line breaks, use the `<pre>` tag.

Example:

```
<pre>
This    is    preformatted
    text.
</pre>
```

Tip

- Use comments to explain your HTML when needed.
- Use proper indentation (whitespace) to make your code readable, even though HTML doesn't require it.
